

LICENSURE POLICY APPROVED BY NCSEA

During the NCSEA 19th Annual Conference held in Oklahoma City, October 20-22, the Member Organization Representatives in attendance discussed and unanimously approved the NCSEA Policy on Separate Structural Engineering Licensure. The Policy encourages all jurisdictions to adopt legislation that defines the practice of structural engineering and restricts it to those who have demonstrated competence by licensure as a Structural Engineer. The Policy supports the use of the NCEES 16-hour examination and the NCEES Model Law Structural Engineer as the basis for licensure of Structural Engineers. Within the Policy, NCSEA also encourages equitable transitioning of engineers currently practicing structural engineering.
